

Accesswood is a wooden pathway that allows to create access on several types of grounds.

Once installed, it creates access to people with reduced mobility, while respecting landscape integration thanks to its wooden, rough and natural aspect.

ADVANTAGES

- > Easy to install and store
 - > UV and sea salt resistant
- > Neat and natural design
 - > Use on sand, grass, gravel
- > Modular and simple slat replacement
- > Design and manufacturing 100% Made in France
- > Environmentally friendly

Technical specifications

<p>Widths: 0,99m or 1,49m Length: Custom-made</p> <p>Weight per sqm: 12kg 26.5lbs</p> <p>Color: Brown wood</p>	<p>Lengths : 0,99 m or 1,49m</p> <p>Width: 95 mm</p> <p>Thickness: 21mm</p>	<p>Length: 2 m Widths: 990 mm - 1490 mm Blade spacing: 15 mm 18 slats per section</p> <p>Width 0,99 m: 2 fixing points for slats to strap Width 1,49 m: 3 fixing points for slats to strap</p>	<p>Wood: class 4 autoclaved pine - PEFC wood</p> <p>Polyester webbing</p> <p>Twisted U-fixing (4/section) on grass</p> <p>Exotic wood wedges and A4 stainless steel screws supplied for connecting sections on sand</p>

Accesswood is an innovative pathway made from interchangeable 100% autoclave class 4 pine slats that can be used to create temporary access while respecting the landscape. It is also an ideal solution for crossing dunes.

RECONDITIONING & SIMPLE REPAIR

SOIL PROTECTION

ECOLOGICAL

Mobility

Pedestrians

- > Family with strollers
- > Wagons

ADA/ABA compliant Disabled standards

Our innovative pathway is removable and can be stored at the end of the summer season. Made up of ready-to-install sections, this product meets the access needs of public authorities and beach concessionaires.

Easy installation & low maintenance

QUICK INSTALLATION

The installation of Accesswood is simple and quick: the ground is first leveled, with an optional thin layer of gravel laid over grass or soil.

The modules are then unrolled and placed edge to edge in the direction of the walkway, maintaining a maximum gap of 2 cm. They are assembled together using the spacers and screws provided and, if necessary, secured to the ground with anchors to ensure the stability and safety of the pathway.

LOW MAINTENANCE

The maintenance of Accesswood is simple and requires little effort: regular cleaning with a broom, a blower, or a water jet helps remove sand and dirt.

In the event of damage, individual slats can be replaced without dismantling the entire walkway. At the end of the season, the modules can be dismantled, rolled up, and stored in a dry place to preserve their durability.

Slats connected by rot-proof polyester straps
